DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Located on the rising slope of East Pleasant Street and originally fronting on St. Paul Place, this painted concrete and brick building, 4 stories high, is divided into 3 sections on E. Pleasant Street by rain leaders.

The right section of the St. Paul Place facade is faced in concrete. It accommodates a wooden door carrying a small circular window. To the right of the door is a projecting, angular display window with 3, large fixed lights capped by a band of molding and projected by iron grills. A perimetric stone belt course defines the division between the first and second floors.

Symmetrical fenestration punctuates the remaining floors. The 3, rectangular windows in each story are double hung with 1/1 lights and are underlined by stone sills. Frosted leaded glass panes differentiate the 2nd story windows.

107 East Pleasant Street, the central section of the northern facade is distinguished by a very small, wooden door which is located to the left of 2 rectangular, double hung windows with 1/1 lights, stone sills, and lintels.

Each upper floor contains 6 windows identical to those on the first floor, the 2nd floor windows containing the aforementioned frosted, leaded glass lights in the 3 right openings.

A band of molding above the 4th floor extends east to include the easternmost section. The flat roof lacks a cornice.
